TECHNICAL SKILLS

Languages/Frameworks/Etc: Python, NodeJS, ReactJS, Java, JavaScript, CSS, MongoDB, HTML, C, SQL, Swift

PERSONAL PROJECTS

Personal Website | ReactJS, CSS | [LINK](#)

September 2024

- Deployed a personal portfolio website using ReactJS and CSS to showcase my skills and projects, featuring an about me, my skills, and my education providing potential employers with insight into my background
- Integrated video demonstrations of my projects, allowing visitors to see my work in action and illustrating my practical experience, enhancing the overall presentation of my skills

NYT Connections Recreation | NodeJS, ReactJS, MongoDB, CSS

August 2024

- Developed a complete clone of the New York Times' game Connections using the MERN stack, leveraging OpenAI's API to dynamically create engaging word categories, which enhanced player engagement by providing a constant opportunity to play and practice
- Conducted thorough backend REST API testing with Postman throughout the development process, ensuring accurate data handling and minimizing bugs, which contributed to a seamless experience with minimal downtime

Spotify Wrapped Project | Python

November 2023

- Created a Python application that integrates the Spotify Web API, enabling users to view their recently played songs and top tracks through an intuitive interface, which enhanced my skills in API interactions and real-time data retrieval

BlackJack Game App | Swift

August 2023

- Built a free blackjack game using Swift and SwiftUI to eliminate the cost of chips required in mobile apps, allowing users to enjoy the game without financial constraints while enhancing my skills in iOS development by implementing all core game mechanics

WORK EXPERIENCE

Online Grocery Associate | Walmart | Milton, On

December 2020 - Present

- Dispense and manage over 100 customer orders weekly, ensuring accurate order fulfillment and high-quality service, which supports the store in meeting its targets and enhances the overall customer experience
- Adapt to evolving processes within the department with an eagerness to learn, successfully handling a variety of tasks and providing seamless service during peak hours, reflecting strong problem-solving skills and the ability to perform well under pressure
- Cultivate strong customer service skills by managing challenging interactions with empathy and professionalism, resulting in a positive brand image and reinforcing customer loyalty
